Something About Grading Land For Irrigation

A good many farmers last year decided to take further advantage of water for irrigation and after their experience the last two or three years can appreciate better some of the practices that are used without question in the older irrigation districts, and which may be used here if the best results are desired.

It is hoped that the good results of last year will persist and make farmers prepare for early irrigation on properly ditched and smoothed land. It is fully recognized that only a small area can be properly graded each year but some progress should be made. No matter what is done or not done in grading the irrigable land, there is no question as to the advisability of running over the lands after seedling and the field lands should not be plowed and sown out before the soil is smoothed enough to hide the ground. These fields should be plenty large and about 10 ft. apart, with only such preparation, and nothing less should be allowed. It is possible to get fair results on our land and put on a reasonable even application of water by flood irrigation. If it is put off until the heads are formed, irrigation will fill the grain set, but cannot bring the low lands that are secured on our fertile soil when moisture is applied early. A grain crop will mature under irrigation nearly every year if irrigated early enough to prevent a backward from drought. Alfalfa and mixed grasses will usually benefit from an irrigation in May, but also of more heavy and compared to grain give relatively more return for the labor of irrigation.

In grading a piece of land, it is necessary to see that no ponds will collect if water is put on the land in any one place. If the water is to be used on a small pond or reservoir at the lowest point on the land, it should be properly prepared and ditched and the water looked after. There need not be any waste water to bother but some provision should always be made to protect the roads and adjoining property. General drainage should be provided over the entire irrigable area and then a good seepage some area, selected on the summation or left for the purpose, should be put in proper shape for economical and even irrigation. Grading the land makes it easier and quicker to irrigate but still more important it enables the water user to make an even irrigation and to make a light or heavy application of water, as may be required for best results. We have graded a number of pieces of land and seeded down alfalfa or grass and it is naturally more important to have the land in good shape than to have it seeded to a more or less permanent crop in a window or pasture.

The taken from one to eight days, a four-wheel tractor for grading. We have also done some grading with a tractor and Tailboard and at apparently some reduction in cost.

Occasionally the best tool is a four-wheel tractor which will grade rapidly and spread it in an even layer of properly set and handled. The tractor can be used for wide drainage channels which do not interrupt furrow operations but allow all excess water to move down the slope of the ditch to be in a ditch as far as possible the irrigation layout and general drainage of all land under a given delivery, then establish the drainage line. Where it is intended to raise grain on the land it may be necessary to take it to spread the work over a larger area, without attempting to complete the job but only filling in small holes and knocking down the mounds so as to improve the land for flood irrigation.

Which is to be ditched and ditched and which is to be ditched and ditched.

Woman's Institute Work For Drought Sufferers

A Card of Thanks has been received by the Strathmore W. I. from the Calgary W. I. Relief Depot for a large box and two bags of splendid clothing and shoes which were shipped on February 18 which was so kindly donated by the people of Strathmore and vicinity.

The Strathmore W. I. also wish to extend their thanks to the Strathmore Hardware Co. for the use of their store room for receiving and packing goods in, also for the donation of the cartage and billings of same.

The 'Flu Epidemic

Apparently the flu epidemic reached its peak last week, so far as this locality is concerned. Very few new cases have developed, and most of the sufferers are making good recovery. Considerable anxiety is felt in regard to several of the local cases at the time writing. Mrs. Robt. Gaudin is very seriously ill. The rest of the Gaudin family are making a good recovery.

Mrs. Knight has taken a turn for the better as reported elsewhere in this issue, and good hopes are entertained for her recovery.

Mr. M. B. Garrett is still in bed, but is improving.

Mr. Eric Richards is able to sit up now, and his family have all recovered.

Mrs. M. S. K. is able to be up now, and her family have recovered and are able to be about.

Mr. and Mrs. Ledwell were ill for several days last month but are O.K. now.

Mrs. Brand is reported better.

Mrs. Taylor, the stenographer, and her family are also making good progress towards recovery.

Other families affected are reported to be getting along all right. There are so many sufferers that it is impossible to enumerate them all, but we hope for all speedy recovery to complete health.

Dr. Givins has done heroic work during the last few weeks and has been nobly assisted by a number of ladies of the town.

The Red Cross has provided organization assistance through its local members.

Result of the Voting
A very small vote was polled in the Municipality of Bow Valley on the 1st inst. The following is the result of the vote: For the bellow, the poll was 56 for and 118 against. The poll was 56 for and 118 against. This is well over the two third majority.

The bellow provides for the establishment of a number of pounds throughout the district and puts the onus on the stockman to keep his cattle from straying and damaging crops.

The small poll is accounted for by the fact that, there being no election for Councilmen, there was not so much interest manifested as there would have been otherwise.

The result of the poll by divisions was as follows:

| | For | Against | Ref. |
|---|-----|---------|------|
| 1 | 2 | 2 | |
| 2 | 2 | 2 | |
| 3 | 11 | 2 | 1 |
| 4 | 1 | 18 | 8 |
| 5 | 16 | 2 | |
| 6 | 4 | 2 | |
| | 58 | 29 | 2 |

The Dominion Chautauque, which comes here late summer, has become affiliated with the other Chautauques of the British Empire.

SUNFLOWER RESULTS DEMONSTRATED AT DEMONSTRATION FARM TO MANY VISITORS

The experiment conducted during the present winter of silo storage, with sunflower corn, and oats and peas, their relative yield per acre and feeding value, has attracted a great deal of attention throughout the west, and yesterday afternoon a party of forty-two, comprising prominent stockmen, dairymen, financiers, and press representatives were shown over the farm, and shown for themselves the operation of the experiment.

Among those present were Dr. G. W. Beeching, shorthand breeder, Dr. Wm. G. L. A. Bowers, T. M. Carleton, J. W. Carleton of the Union Dairy Co., A. E. Cross, Calgary Brewing and Malting Co., Capt. G. C. Cunniff, E. Gordon, representative, Soldier Settlement Board, N. S. Hayes, Kailynne, Mr. McRory, U.S.G. C. Peppard, P. Pallin, Dutchfield, and Wooding. Crown Feed and Fertilizer Co., J. H. Stewart, a missionary Stewart, of the Board of Commerce and a number of others.

The party came down on the afternoon train, and were driven to the farm on sleighs. There they were shown over the whole of the farm, and the various features were explained by Mr. A. A. Campbell, farm manager. A great deal of interest was shown, and many questions were asked regarding the silos and the method of growing sunflowers. The farm dairy boys came to for a great amount of favorable comment.

Following the tour of the farm the guests were entertained to lunch at the Clubhouse, and Mr. G. H. Hutton gave a short explanation of the results derived from the experiments conducted, in the course of which he said that last year Montana and several other states had conducted experimental work with sunflowers. Their object in conducting the experimental work in Strathmore was that sunflower corn in Strathmore was that

DROUGHT RELIEF FUND

This week we acknowledge the following additional subscriptions to the fund for the drought sufferers in Southern Alberta:

Previously acknowledged, \$15.00

J. A. Cameron 10.00

H. Van der Loop 2.00

Up to date the response for help has been very poor. Strathmore can do much better than this, and it is a shame that should speak for itself. Subscriptions can be taken by Mr. F. T. McElroy or at the Standard Office.

BAND MAKING PROGRESS

Strathmore Town Band, under the management of Mr. M. S. Little, is making good progress, though the flu epidemic has somewhat affected work on the practice.

By the beginning of the summer season the band should be in good shape to give public performances, as most of the players are former musicians. The band are still short of a few instruments, and it is probable that they will hold a concert at an early date in an endeavor to raise funds.

Mr. Little, in addition to his work with the band, has now got so many customers practicing indignantly as he has instruments for them. They are showing up well, and can already give the rendering of three well-known tunes.

From all appearances, Strathmore is not going to go short of outdoor music during the coming summer, and it is likely the town fathers can succeed the subject of erecting a bandstand in the park.

The yield per acre of the various crops was:

YOUNG GIRL KILLED NEAR ROCKYFORD

A sad accident happened on the farm of Mr. T. Colbert on Friday evening, resulting in the death of Mr. Colbert's little daughter Sybil, aged three years.

While Mr. Owen, who is employed with Mr. Colbert, was bringing in his sheep into the house on his shoulder, a leg of the hog caught in the jamb of the door, knocking it off his shoulder. It fell in the path of the little girl, killing her instantaneously.

The hog was frozen, and would probably weigh 200 lbs., and the mass was sufficient to knock the little girl Mr. Owen was aware that the girl was anywhere near at the time, and feels the effects of the accident deeply, and much sympathy is being extended to the parents in their bereavement.

The funeral took place to Rockyford Cemetery on Sunday. Mr. C. W. Chalmers was the undertaker.

MOVIES TONIGHT

Tonight the attraction at the Movies is "Charlie Chaplin in 'The Champion' and Harry Carey in 'Three Men in a Boat'." The latter is a new production, the picture being held last week, has now been held, the evidence having subsided.

New Wednesday attraction is "Det. Lyle in 'Mind Man's Eyes'." A super production, with other good attractions.

Several new houses are reported to be in contemplation in the village of Tabor. It would be hard to find a more progressive community than of Tabor, and the situation of the village is both convenient and beautiful. A city that is set on the hill cannot be hid.

Chief Gillespie, of Lethbridge, is determined to muzzle all dogs and "reluctant" dogs.

Hervey Notes

The flu has not yet visited this vicinity. We trust the call may be postponed.

A certain bachelor living in this district who is certainly anxious to find a long haired woman says "That his wife must be so beautiful, so well dressed, and so attractive that when she passes through Strathmore every eye will be strained and every neck craned to get a look at her."

Mr. bachelor the ladies round here, young and old would not relish being taken as curios, but we advise you to have a few silk dresses ready, they're certainly a good thing.

We can vouch for the truth of the following statement. A certain gentleman went into the store at Adelaide the other day and asked for some soap. The grocer handed him some toilet soap. "I will take two pieces," he said. "I want to have a good wash before spring comes and the snow goes." We presume that his wife will have to wash it and use the scrubbing brush.

Mrs. Sanderson, teacher, spent the weekend at Rockyford on a visit to the "Best Ranch."

The C.P.R. Japanese Colony are the first to visit the Strathmore of the flu.

Mrs. Wilfred McKenzie has been in the city in her work and devotion to the sick, even taking a little Japanese baby into her home and raising it.

We are glad to learn that Mr. and Mrs. John Freeman and little daughter have recovered from their recent severe sickness.

A new resident, Mr. Spaulding is on the McLean Ranch here.

Mr. Fred McKenzie is spending a few days in Calgary.

In spite of the bad roads there was a good attendance at Sunday School.

Sunday, Next Sunday Mr. John Kent will take the lesson.

Mrs. and Mr. Miller formerly of Strathmore now of Tabor were visited by the stock valentines day, a handsome baby box to be laden their long baby and mother are doing well.

SOMETHING ABOUT GRADING LAND FOR IRRIGATION

Continued from front page.

When irrigated the spots on next
year's work can be located, thus if
the field is worked every time it is
in summer fallow it will gradually be
put in good shape. It is of course un-
necessary to have the land in summer
fallow when properly organized on
an irrigation basis with a crop rota-
tion including alfalfa, clover or grass.
On the other hand when land is to be
seeded down to hay or pasture grass
it is usually in a small acreage and
it will pay to spend the time to put
it in good shape for even and com-
mercial irrigation.

The border system of preparing
land is best and is recommended
where it can be carried out at a reason-
able expense. The border system is
good but for most of our lands and
considering cost and simplicity of
preparation the method of flooding
from field ditches is believed to be
most practicable. Those who are in-
terested may receive advice and sug-
gestions by calling at the Strathmore
Irrigation Office.

SUNFLOWERS FOR DAIRY CATTLE PROVE SUCCESS AT DEMON- STRATION FARM.

The experiment initiated at the
C.P.R. Demonstration Farm in grow-
ing sunflowers for feed purposes and
storing in silos has proved remark-
ably successful, according to the re-
port given by Mr. G. H. Hutton to
the Alberta Fairmen's Convention at
Edmonton last week.

Not only will the sunflower cause
silage to grow more abundantly
but it will prove a step in the di-
rection of producing that silage at a
cheaper cost, declared G. H. Hutton,
annual industry for the C.P.R., and
president of the Western Canada
Livestock Association. Mr. Hutton
reviewed in graphic style the experi-
ments carried on at the C.P.R. de-
monstration farm at Strathmore, in
growing sunflowers for silage and in
the results already obtained in feed-
ing them to dairy cattle.

Summarized, these experiments
show that sunflowers will yield about
12,000 pounds per acre, as compared
with between five and six thousand
pounds of corn or oats and that per
acre. Sunflower silage has been found
to be the equal pound for pound to
the silage from oats and peas or corn
and one acre of sunflowers will pro-
vide for feed five or six dairy cattle as
compared with the yield of two to
three acres in hay or light feed. It
keep one cow in feed for one winter.

SCHOOL EXHIBITIONS IN SASKATCHEWAN

The outstanding character of the
past year's school exhibition quickly
demonstrated has been the interest
shown in the general public
teachers and pupils. The exhibition
at the public is indicated by a
well attendance of about 100,000
12 school children where about 100,000
100,000 for adults made over 100,000
exhibitors. An article by E. W. Davis
in the "The Agricultural Channel"
for January shows that the school
exhibition held in an exhibition
as was organized in 1900 and opened
to a satisfactory basis by the Cana-
dian School Teachers Association. The
only the following five years the
past development was slow but in
1915 the present era of rapid pro-
gress began. The following table
shows the number of exhibitions in the
number of exhibitions each year 1911-
1915.

| Year | Number of exhibitions |
|------|-----------------------|
| 1911 | 10 |
| 1912 | 24 |
| 1913 | 100 |
| 1914 | 120 |
| 1915 | 110 |
| 1916 | 175 |

The school exhibition is a device
now adopted almost in every com-
munity organization, the main pur-
pose of which is to educate the public
in general and to give the school
children a chance to show their
work and to give the public a chance
to see the work of the school children.
In 1916, a school exhibition was
held in the school building. The
school children showed their work
in various subjects and the public
was given a chance to see the work
of the school children. The school
exhibition has been a great success
and has been a great help to the
school children.

THE CHAMPION

When, then, my friend, the fact of the
fact.

When in the state of sleep has been
slept.

When the vision comes with full intent
To find the place of second nature
Which had been obtained and pro-

Wednesday 8 p.m. Junior Christian Endeavor.

On Sunday evening in connection with the service the pastor will read another section of "The Trail a Boy's Tale."

A large Sunday School Managing Committee meeting on Monday evening, 10:15, arrangements were made to have a Sunday School library and reading room in the basement of the Church. Committees were appointed to secure librarians and to arrange special features for the Sunday school Easter service. Every effort is being made to equip the school with all conveniences that will further a strong religious education and culture.

At the official Board Meeting on Monday evening arrangements were made for special Lenten services during Passion Week. Some other arrangements will assist the pastor in these services which will be fully announced at a later date. It was also arranged

to secure Miss Selzer a noted dramatic reader of Calgary to give her famous drama "The Sign of Honor" on April 10th.

Strathmore, Alberta, March 3rd 1920

New Bonus Scheme Proposed

A new bonus scheme for returned soldiers, which would involve an outlay of \$25,000,000 if adopted by the Government, was presented by W. S. Woods, president of the Calgary branch of the Great War Veterans' Association, and adopted by the members as the official scheme of the local branch held in the Allen theatre on Monday afternoon.

Mr. Woods also stated that the overhead expense in operating the scheme would be practically nil. He stated that a bonus scheme of this kind would do away with the need of sending to Ottawa to verify dates etc. The bonus is to be used for re-establishment purposes and has nothing to do with pensions or disability. In the event of a soldier who has died on duty, a lump sum of \$1500 should be paid over to his widow and in the case of a single man, his dependent parents.

No Conflict With Pensions

Care must be taken that this bonus does not conflict with pensions in the minds of returned soldiers. Instances will be given where a soldier who was gassed at St. Julien and discharged, but who would only receive a gratuity under this plan, of \$365. If, however, this is to be regarded as an increase in the soldier's wages it must in no way be allowed to be confused with the pensions.

A Simple Plan

In introducing the new plan, President Woods stated that one of the features of it was that a school child could understand it so simple was it.

AUCTION SALE

of
FARM, STOCK, IMPLEMENTS, FURNITURE, ETC.

F. M. DEWITT'S FARM

Thursday, March 4

SERVICE

WHEN you buy a tractor you want first, the most efficient, dependable and economical tractor on the market. Second, you want to be sure of a personal service from your dealer that means something. For what good is the very best tractor to you if you don't thoroughly know how it works and how to keep it working?

I went to the Advance-Rumely Dealers School at LaPorte, Indiana, where the famous OilPull Tractor is built for the express purpose of putting myself in a position to give you such service. I was privileged to attend this two weeks course in company with some 250 other dealers selected by the Advance-Rumely Thresher Company.

During the two weeks we worked, and worked hard. We learned the tractor thoroughly—not from books—but by stripping it down and assembling it again. We worked on the motor, transmission—the cooling, ignition and lubrication systems—in fact every part of the machine.

And they put the "cards on the table" there at LaPorte. We were

allowed, and urged to look into every branch of the factory—no department was closed to us—nothing was kept from us. We saw the whole inside workings. The bigness of it impressed me—the machine shop alone is 800 feet long—but more than that was the systematic way things are organized and the thoroughness with which the goods are manufactured, inspected and tested. One of the machines, a cylinder grinder, is the only machine of its kind in the country. The OilPull cylinders and pistons, you know, are ground to within 1-1000 of an inch.

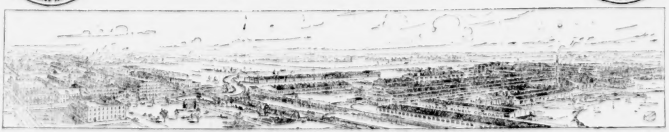

I was pretty well satisfied before I went down to LaPorte that the materials and workmanship that went into the OilPull were the best that went into any tractor—now I am SURE of it.

In the Rumely OilPull Tractor I am not only selling absolutely the most efficient, dependable and economical tractor on the market—and guaranteed, remember—but I am backing it with a personal service that means something.

FORD CLINIC

To Be Held Here March 1920

Of great interest to local tractor owners will be March 19 and 20, when the Ford Motor Company are sending two experts from America to demonstrate the care, repair and operation of the Ford tractor.

For those who at present have a Ford tractor, or those who are thinking of investing in one, this will be a good opportunity to pick up a lot of information.

AUCTION SALES

No new lots are required for this week, but there will be sales every day this week.

On Monday the Chris Hansen sale of House and furniture of successfully ending Mr. T. H. Hansen, on Tuesday Mr. J. W. Freeman's sale at Strathmore took place, today the property of Mr. G. D. Dore's sale took place. On Thursday Mr. Dore's sale took place. On Friday Mr. Dore's sale took place. On Saturday Mr. Dore's sale took place.

There will have many requests for further information.

U.S.A. DRIVING

The public meeting of the U.S.A. driving club, was held on Tuesday evening, previous to the club.

Caplan Nelson and Furness, the members of the club, of which they are members, are members of the U.S.A. driving club, of which they are members, are members of the U.S.A. driving club, of which they are members.

A committee has been set up with the intention of holding a meeting of the club, of which they are members, are members of the U.S.A. driving club, of which they are members.

Local Birthings

A son was born to Mr. and Mrs. J. L. L. on Sunday, March 15, at 11:30 a.m., but in making a good recovery as could be expected under the circumstances.

Mr. and Mrs. Knight wish to express their thanks to their many friends for their kind expressions of sympathy and help in the death of their son Cyril.

Mrs. Knight is still seriously ill with influenza, but has taken a turn for the better since the week end. We hope she will soon be able to move from her home and be able to go to work.

Twilight, Monday, March 15. Mr. M. L. L. had a very happy and original all on the last day of the month, a happy good ending as well as good advertising.

The Elmore and Pearson sale took place, which was to have taken place on Monday last, was postponed on account of the weather, and took place on Tuesday last. Consequently Mr. L. L. L. was not able to attend. The postponed sale will take place today.

A new factory is to be added to the No. 10 road, between Mr. L. L. L. and Mr. L. L. L. who have been seen that are being over the property, and are being over the property, and are being over the property.

Advertising

May have been the luxury of yesterday, but it is the necessity of to-day, to every business man who wishes to get ahead and get the trade of the district in which he is located.

Well-written and snappy advertising will produce results out of all proportions to its expense. We are willing to help you write your ads. If you supply us with an idea of what you want to advertise.

A lot of business goes out of this district that might as well be kept here if you go after it. You can get in touch with the people of the Western Bow Valley every week through the medium of the Strathmore and Bow Valley Standard, the only medium covering the whole of that territory.

The season for heavy buying will soon be here. Spring needs must be supplied. You can supply them if you let the people of the district know that you can sell quality goods at right prices. Let them know what you have through the columns of the

STRATHMORE & BOW VALLEY STANDARD
 John Mackenzie, Proprietor.

**RECORD SNOWFALL FOR
SOUTHERN ALBERTA.**
Snowfall for the winter of 1918-1920
in Southern Alberta has beaten the
five year record by twenty inches
already. Up till February 19th the
snowfall measured amounted to 51
inches, as against the five-year aver-
age of 31.6 inches.
The winter of 1911-1912 was one of
heavy snowfall, much of it coming
early in October, the total for that
winter being 48.2 inches. However this
winter has five weeks to go yet and
that figure is already beaten. Follow-
ing are the figures for the past five
years:
1911-12 48.2
1912-13 42.7
1913-14 35.6
1914-15 32.8
1915-16 23.8
1916-17 21.6

SAFEGUARDING THE LIVE STOCK INDUSTRY.

At present we are finding two of
our great industries coming into con-
flict with each other and that con-
flict is between the live stock indus-
try and the most packing com-
pany. There is now a better under-
standing between the two for they
realize their mutual interdependence
on each other. Between these two
industries comes a most important
factor which operates in the best in-
terests of both: this is the live stock
policy. These policy are now much
improved at live stock shipping com-
panies and leading market cities in Canada,
and since August 1st they have been
under the control of the Dominion
Department of Agriculture through
the Live Stock Branch. At that time
the regulations prescribed by the
Live Stock and Live Stock Producers
Act were passed and since then the
construction, equipment, maintenance
and operation of stock yards are
subject to the approval of the federal
Minister of Agriculture.

Closely identified with live stock
policy are live stock exchanges oper-
ating on all markets and seeing the
policy for the conduct of business
among the commission agents and
dealers. The objects of the Exchange
are to establish, uniformly in
the trade, and to provide speedy ad-
justment of business disputes. A series
of articles on live stock and ex-
changes appears in the January
number of the Agricultural Gazette.
These articles present the facts re-
specting the operation of stock yards.
It is pointed out that the stock yard
is a semi-public institution operated
as a public market and its business
is the warehousing of live stock. It
is a great advantage to it that it pro-
vides a medium where the men with
live stock to sell find buyers and
buyers find live stock.

An Hospital Experience

Colony General Hospital.
Patient W. A. Hutt.
Temperature 99 in the shade. Pulse
variable. Respiration, epistaxis.
Blood test, faded red color, and a
little thick clots in the urine.
After having a fine time, our nurses
are all young and good-looking and
quite suddenly after our lunch
we have to do it to the fact that
our respective backs and study the
color scheme on the ceiling and con-
sider the sheep jumping over the stile on
the wallpaper. The patients I mean
not the nurses. The nurses seem to
have innumerable small chores that
keep them running from one place
to another. Most of them jump about
as much that they have that feel.
"They are all well, simply well, about
me." If I wasn't diplomatic I couldn't
keep them from fighting, as it is they
are all green-eyed devils.

Our nurses, when we go in to the
early morning about eight o'clock in
the morning, find the bed in warm
water, after which we have our
breakfast in bed. Our breakfasts are
balanced scientifically according to
our physical condition and needs. For
instance, some of the more delicate
patients get lightning like brains
fried in a casserole of hot soup. After
some time spent in eating and sleep-
ing and seeing the nurse in various
positions controlling science and our
wishes self-sacrificing servants form-
ing our environment. We compare our
selves for peaceful sleep and our
glorious nurses gently massage us
with oil of rose and other Oriental
oil products followed by a brisk
rub after which we drift drowsily off
to sleep while our beautiful nurses
bask so comfortably by the hand and
gently stroke our fevered brow while
she soothes us with a little love. I
mean plantation song in sweetest soft
and low.

"Oh God! Oh God! how that other
stinks! what a dream! I was out here
nursing! I was sick, where's a job. I gotta
throw up. Oh God! Did I swear much
nurses, in my sleep I was a nurse."

LAND BARGAINS

We have now the following lands to
sell on cash payment, 400 acres 5
miles south of town known as the Roy
Gardner farm, well improved. This is
a real farm and a good money maker.
But only unless you have some cash.
616 acres two miles west of town
known as the Bear Section, well fenced
and crossfenced, 200 acres culti-
vated. 200 acres can be 220 acres in
26-25 adjoining the A. Pool farm, im-
proved. 200 acres of this can be farm-
ed with a fair cash payment. This
land can be bought at \$22.00 per acre,
or only three miles from station.
15 acres with house, barn and other
outbuildings, fenced and broken, only
1 mile from Strathmore, \$1000.
The substantial men of any coun-
try as a rule are the men who hold
the files to the Real Estate of that
Country. The opportunities to get in
with small amounts of capital are
HERE NOW. Can you manage to get
in on something, others are, and are
making good.

Sir Henry Drayton
Minister of Finance

SAYS:—The homely virtues of
work and thrift are all that
Canada needs today.
If you would make a personal
application of the principles of
thrift, set aside a specific amount
from your weekly income and add it
to your savings account.

ASSETS EXCEED \$174,000,000

UNION BANK OF CANADA

Strathmore Branch and Safety Deposit Boxes, J. L. Van Tighem, Manager
Landon Branch and Safety Deposit Boxes, A. L. Smart, Acting Manager
Branches also at Standard and Carleton Place

BUY AN IRRIGATED FARM
FROM

THE CANADIAN PACIFIC RAILWAY

BECAUSE—
Irrigation makes the farmer inde-
pendent of rainfall, and insures
good crops, not occasionally, but
every year.
Irrigation makes possible the
successful culture of alfalfa, the
king of fodders, which insures
good returns in dairying and
mixed farming.
Irrigation means intensive farm-
ing and close settlement with all
the advantages of a densely popu-
lated agricultural community.
Irrigation in the Canadian Pacific
Railway Irrigation Block is no
longer an experiment, the
years that it has been tried
having absolutely demonstrated
its success wherever intelligently
applied.
You can buy irrigated land from
the Canadian Pacific Railway at
prices averaging \$50 per acre,
with twenty years to pay and
the privilege of a loan of \$2,000
for improvements (4% interest,
no principal after first pay-
ment until end of fourth year,
reduced interest if settlement
conditions are complied with
and no water rental for first
year. Contract can be paid in
before maturity if desired.

This is the most liberal offer of irrigated farm in 10 on record. For
full particulars, apply to

ALLAN CAMERON, General Sup't of Lands
Canadian Pacific Railway, Dept. of Natural Resources,
Calgary, Alberta.
